PROFESSIONAL SUMMARY

Software engineer with 4+ years of experience delivering production Android, iOS, and Flutter applications, integrating REST APIs, real-time systems, authentication, and cloud services. Built LLM-powered conversational and multimodal AI experiences using Cloudflare Workers, Firebase Cloud Functions, Replicate, and ElevenLabs. Experienced in mobile releases, debugging, cross-functional delivery, and translating product requirements into deployed features. Seeking Forward Deployed Engineer, AI Application Engineer, and Software Engineer roles.

TECHNICAL SKILLS

Languages: Kotlin, Java, Swift, Dart, JavaScript, Python, SQL | Mobile: Android SDK, UIKit, Flutter, Material Design, XML, View Binding, WebView, WKWebView

Backend & APIs: REST, Retrofit, OkHttp, Alamofire, URLSession, Node.js, Firebase Cloud Functions, Cloudflare Workers, OAuth | Realtime: WebSockets, Scarlet, Starscream, Firestore

AI & Cloud: LLM API integration, Replicate, multimodal AI, ElevenLabs, content moderation, Firebase Auth/FCM/Hosting, AWS S3/Cognito | Data: Firestore, Room, MySQL, SharedPreferences

Engineering: MVVM, repositories, Kotlin Coroutines, RxJava, Git, Gradle, CocoaPods, CI/CD, unit/UI testing, Play Store and App Store delivery

PROFESSIONAL EXPERIENCE

Mobile Application Developer — Novora Technology Group | Jan 2024 – Present | Bengaluru, India

- Develop and maintain Android, iOS, and Flutter application experiences; collaborate with product, backend, QA, and design teams to deliver customer-facing features.
- Integrate REST APIs, Firebase services, authentication, push notifications, and real-time updates; troubleshoot production defects and release issues.
- Manage Android and iOS builds, signing, TestFlight, store releases, and CI/CD workflows; optimize performance and application stability.

Software Engineer — yvs.video | Jan 2022 – Oct 2023 | Hyderabad, India

- Built Android and Android TV/Fire TV OTT features using Java/Kotlin, ExoPlayer/Media3, HLS/DASH, and Widevine DRM.
- Integrated third-party SDKs and REST APIs; debugged playback, device compatibility, and production issues; supported testing and releases.

SELECTED PROJECTS

GI — Bhagavad Gita Intelligence | Flutter, Dart, JavaScript, Cloudflare Workers, Node.js, Firebase, Replicate

- Built a conversational, LLM-powered spiritual application with Flutter clients and a private AI API on Cloudflare Workers; configured Firebase Functions as supporting and fallback endpoints.
- Integrated Replicate-hosted text, image, video, avatar, and moderation models plus ElevenLabs voice generation; added speech and media experiences.
- Implemented Firebase Authentication, server-controlled subscription/usage records in Firestore, purchase verification through Google Play and Apple server APIs, and scheduled daily notifications.

Meetingbox — Multi-brand Event Platform | Native Android (Kotlin), native iOS (Swift/UIKit), Firebase, AWS

- Developed event features including agendas, attendee/exhibitor directories, chat, live polls, social wall, bookmarks, galleries, forms, QR scanning, maps, and notifications across branded Android/iOS variants.

- Integrated Retrofit/OkHttp and Alamofire/URLSession APIs, Scarlet/Starscream WebSockets, Firestore, Firebase Messaging, AWS S3/Cognito, and OAuth-based authentication.

Abode — Spiritual Travel Planner | Flutter, Dart, Firebase Authentication, SharedPreferences

- Built a spiritual-travel planning app with Material Design UI, custom dark-and-gold styling, and Android/iOS targets; implemented phone OTP authentication using Firebase.
- Used ChangeNotifier/ListenableBuilder and local persistence for saved places, trip requests, journal entries, and progress; integrated on-device text-to-speech for reflections.

Aqua Ping — Hydration Reminder | Flutter, Dart, Android, local notifications

- Developed an Android hydration tracker with daily goals, drink logging, timeline, and configurable timezone-aware reminders; stored data locally using SharedPreferences.

Additional projects | Beloved by Kaefer (native Android/Kotlin and iOS/Swift); Spaarks (Android/Firebase/Maps); Timesplay, Watcho, Sun NXT (Android OTT)

EDUCATION

Bachelor of Engineering, Computer Engineering — RMD Sinhgad School of Engineering, Pune (2020)

Diploma in Computer Applications — Ekalavya Shikshan Santha's Polytechnic (2015)

CERTIFICATIONS

Advanced Certification in Generative AI and Multi-Agent Systems — Coding Ninjas
Developer Program — Accenture
Microsoft AI Classroom Series — Microsoft
Python — HackerRank
Machine Learning with Python — Decodr Technologies
Artificial Intelligence — Accenture in India
