PROFESSIONAL SUMMARY

Mobile Application Developer with 4+ years of experience building scalable Android, iOS, and cross-platform applications using Flutter, Dart, Kotlin, Java, and Swift. Experienced in designing production-grade mobile applications using Clean Architecture, MVVM, state management, RESTful APIs, Firebase, and relational databases. Strong expertise in Android, Flutter, OTT platforms, mobile application performance optimization, CI/CD, and Google Play & Apple App Store release management. Experienced in backend development using Node.js, PHP, Laravel, and MySQL, with hands-on skills in building AI-powered applications using Large Language Models (LLMs), Generative AI, and conversational interfaces.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android SDK, Kotlin, Java, Swift, SwiftUI, Jetpack Compose, XML, Android TV, Fire TV
Flutter Ecosystem: Flutter SDK, Provider, Riverpod, BLoC, GetX, Platform Channels, Material Design, Cupertino, Responsive UI
Programming Languages: Kotlin, Java, Swift, Dart, Python, SQL, Objective-C, Core Java
Architecture & Patterns: Clean Architecture, MVVM, MVI, Repository Pattern, Dependency Injection, Modular Architecture
Android Libraries: Jetpack (Room, Navigation, LiveData, ViewModel, WorkManager), Coroutines, Retrofit, Dagger/Hilt, Glide, ExoPlayer/Media3
Backend Development: Node.js, PHP, Laravel, Express.js, REST APIs, API Integration, Client-Server Architecture
Database: MySQL, SQL, Firebase Firestore, Firebase Realtime Database, Room Database
Generative AI: Large Language Models (LLMs), Generative AI, Prompt Engineering, AI API Integration, Conversational AI, AI Chat Applications, Context-aware AI Systems
Cloud & Firebase: Authentication, Firestore, Cloud Messaging, Push Notifications, Crashlytics, Analytics, App Distribution
OTT/Streaming: ExoPlayer, Media3, HLS/DASH, Widevine DRM, Adaptive Bitrate Streaming, Android TV, Fire TV
Testing: JUnit, Espresso, Flutter Test, Widget Testing, Integration Testing, Unit Testing
Dev Tools: Android Studio, VS Code, Xcode, Git, GitHub, Postman, Charles Proxy, Jira, Gradle, CocoaPods, CI/CD

PROFESSIONAL EXPERIENCE

- | | |
|--|--|
| Mobile Application Developer
Novora Technology Group | January 2024 – Present
Bengaluru, Karnataka, India |
| <ul style="list-style-type: none">– Develop scalable Flutter applications for Android and iOS, serving 100K+ active users with 4.5+ star rating– Design applications using Clean Architecture and MVVM with proper separation of concerns and dependency injection– Build reusable Flutter components and responsive UI; implement Provider and BLoC state management– Integrate REST APIs and Firebase services, resulting in 40% reduction in crash rates and improved app stability– Configure Android and iOS production builds, including iOS signing, provisioning profiles, TestFlight, and IPA generation– Resolve Flutter, Gradle, CocoaPods, and Xcode build issues; manage Play Store and App Store releases– Build and maintain CI/CD pipelines, improving deployment frequency and code quality standards– Improve application performance through profiling and optimization, reducing load times by 30%– Collaborate with Product, QA, Backend, and Design teams in Agile sprints to deliver 15+ feature releases | |
| Software Engineer
yvs.video | January 2022 – October 2023
Hyderabad, Telangana, India |
| <ul style="list-style-type: none">– Developed Android OTT applications along with Android TV and Fire TV applications for 50K+ daily active users– Implemented ExoPlayer and Media3 with HLS and DASH streaming, and integrated Widevine DRM– Integrated Firebase services and Retrofit APIs for real-time data synchronization and analytics– Worked with third-party SDKs including AppsFlyer, CleverTap, and iZooto, reducing production issues by 45%– Debugged production applications and performed unit and UI testing, achieving 80%+ code coverage– Delivered production releases in collaboration with QA teams to ensure smooth app performance | |

PROJECTS

Bhagavad Gita Intelligence (GI) | *Flutter, Node.js, MySQL, Generative AI, LLM*

- Developing an AI-powered conversational mobile application inspired by the teachings of the Bhagavad Gita
- Built using Flutter with a Node.js backend; integrated LLM-based conversational AI
- Designed AI chat interfaces with conversational context and applied prompt engineering for context-aware responses
- Implemented backend APIs for AI communication and managed conversation history with intelligent response generation

Beloved by Kaefer | *Flutter, Dart*

Jul 2024 – Present

- Developed cross-platform Flutter application with Clean Architecture and reusable UI components
- Integrated REST APIs and supported Android and iOS releases

Meeting Box | *Flutter, Firebase*

Feb 2024 – Present

- Built meeting management application with private chat, gallery management, and speaker management
- Added bookmarking functionality and integrated Firebase services; published on Google Play Store

Sparks - Local Social Network | *Android, Firebase, Google Maps*

Nov 2023 – Jan 2024

- Built location-based social networking application integrated with Google Maps
- Implemented Firebase Authentication; published on Google Play Store

Timesplay - OTT Platform | *Android, ExoPlayer, Jira, iZooto*

Sep 2023 – Oct 2023

- Developed OTT streaming platform offering entertainment options for diverse user preferences
- Implemented media-rich UI flows and video playback using ExoPlayer for Times Network

Watcho - Web Series & Movies | *Android Studio, Android SDK, Core Java*

Aug 2023 – Oct 2023

- Worked on core functionalities of OTT streaming application for web series and movies

Sun NXT | *Android, Java, ExoPlayer*

May 2022 – Jul 2023

- Developed OTT application features and implemented adaptive bitrate streaming
- Integrated Widevine DRM, built search functionality, and integrated REST APIs

EDUCATION

RMD Sinhgad School of Engineering

Bachelor of Engineering in Computer Engineering

Pune, Maharashtra, India

August 2015 – June 2020

Ekalavya Shikshan Santha's Polytechnic

Diploma in Computer Applications

Pune, Maharashtra, India

2012 – 2015

CERTIFICATIONS

Generative AI | *Coding Ninjas*

Flutter Development | *Great Learning*

Android Application Development | *Great Learning*

Kotlin Programming | *Programming Hub*

Java Basics | *HackerRank*

Developer Program | *Accenture*

Microsoft AI Classroom Series | *Microsoft*

Python | *HackerRank*

Build Face Recognition Application using Python | *HCL GUVI*

Machine Learning with Python | *Decodr Technologies*

Fundamentals of Data Science using Python | *NSDM INDIA*

Artificial Intelligence | *Accenture in India*

Data Analytics for Decision Making | *FutureLearn*

Red Hat Linux | *RankSheet Online Services Pvt. Ltd.*
